*****FOR IMMEDIATE RELEASE*****

Antares Audio Technologies Introduces Auto-Tune Live - Real-Time Pitch Correction and Auto-Tune Vocal Effect

Full-Featured Automatic Pitch Correction Plug-in Features Ultra-Low Latency for Live Performance and Tracking

(Scotts Valley, CA, August 1, 2012) -- Antares Audio Technologies today announced the introduction of Auto-Tune Live real-time pitch correction and Auto-Tune Vocal Effect plug-in. Featuring Antares' world standard Auto-Tune professional pitch correction, Auto-Tune Live is a real-time tool for correcting pitch errors, creatively modifying the intonation of a performance or producing the iconic Auto-Tune Vocal Effect. Specifically optimized for use in live performance and when tracking in the studio, Auto-Tune Live features ultra-low latency and comprehensive real-time MIDI control of its key performance parameters for the ultimate in creative real-time pitch processing..

Key Auto-Tune Live features include:

- Ultra low-latency performance for virtually instant response on stage or when tracking in the studio
- Real-time MIDI control of Auto-Tune Live's key performance parameters
- MIDI control of target notes that lets users define target pitches in real-time during performance
- A Humanize function for pitch correction that is even more natural and realistic
- Natural vibrato control that allows the modification (in real time) of the depth of any vibrato that is present in the original performance
- Formant correction and Antares' unique Throat Modeling technology for unmatched creative control of vocal timbre
- Superior pitch tracking and correction with Antares' second-generation Evo™ Voice Processing Technology

“With the trend to using Auto-Tune during tracking, we've been hearing from many of our professional Auto-Tune users that they'd really like a full-featured real-time Auto-

Tune plug-in with minimal latency,” said Marco Alpert, Antares VP of Marketing. “With Auto-Tune Live, we've focused on meeting that need, as well as offering enhanced MIDI features for a new level of real-time performance control.”

Auto-Tune Live is available in RTAS, VST3 and Audio Unit versions for Macintosh and RTAS and VST3 for PC. The VST3 and Audio Unit versions are 64-bit compatible. Macintosh versions require an Intel processor.

More Auto-Tune Live information can be found at the Antares web site: http://www.antarestech.com/products/auto-tune_live.shtml

About Antares Audio Technologies

Antares Audio Technologies is the worldwide leader in the development of unique vocal processing tools. Having revolutionized vocal production with the ground-breaking Auto-Tune pitch correction technology, Antares is committed to providing producers, engineers, sound designers and musicians with powerful, innovative, easy-to-use tools for enhancing and manipulating the human voice. Now, with the introduction of its revolutionary Auto-Tune for Guitar technology, Antares is profoundly expanding the flexibility and creative potential of the electric guitar.
